Intern Daily Documentation

Date : 17th September 2025 **Name :** Vijis Durai R

Tasks & Projects

- **Description:** Worked on project setup, testing, and reviewing code functionality.
 - **Activities:**
 - Cloned project files and source code from repository
 - Reviewed code structure and dependencies
 - Set up the project on local system and configured environment
 - Ran the project successfully on system
 - Tested the application with sample prompts to validate outputs
-

Time Log

- **Cloning & Setup:** 1 hr
 - **Code Review:** 1.5 hrs
 - **Running & Configuring System:** 1 hr
 - **Testing with Prompts:** 1.5 hrs
 - **Total Hours:** 5 hrs
-

Skills & Learnings

- **Skills Developed:**

- Hands-on practice with project setup and environment configuration
 - Code reviewing and debugging skills
 - Understanding of prompt testing in project workflow
 - **Key Takeaways:**
 - Importance of environment readiness before running projects
 - Clearer idea of testing project functionality using sample prompts
-

Challenges & Solutions

- **Obstacles:** Faced minor issues while running the code due to dependency mismatches.
 - **Solutions/Strategies:** Fixed by installing the correct dependencies and reconfiguring the environment.
-

Self-Reflection

- **Observations:** Today's work helped me strengthen my basics in project setup, review, and testing. It gave me confidence to handle real-world codebases.
 - **Future Actions:** Tomorrow, I plan to dive deeper into testing edge cases and documenting results systematically.
-
